Tap photos and videos and make sure the backup and synchronization are activated. Here you can choose what to synchronize with your Google account. Microsoft has made a fantastic site update job to simplify all your most recent photos and even automatically your photos and create photos for you. Storing photos at OneDrive on Windows Phone for Windows Phone owner you will be asked to run The backup of photos (and other telephone data) for OneDrive during the initial configuration. There you have some options on what you want the quality to be. Download and install the OneDrive app for Android. You may need to search to find the files you want. To ensure that everything is backed up on OneDrive, and the quality of your backup photos, go to Settings> Backup> Photo + Video. When you initially set it, you will automatically ask you if you want to backup photos and full resolution videos on OneDrive. We have separate guides on how to back up your iPhone and backup your computer. Special offer for Gear readers: Receive a 1-year-wired subscription for \$ 5 (\$ 25 off). Touch it. Make sure you disable it if you will use oneDrive instead. AUTO Load photos and videos on iOS devices (iPhone / iPad) for OneDrive moving About iOS, you need to download the OneDrive app, which works on both iPhone and iPad. As I said before, you can easily see and share photos online. What are your thoughts? Most of them offer free cloud storage, but what you can back up and how to run differs from the app to app. We looked at how to back up mobile photos on some of these before and usually you can install it to be automatic, even if other files need to be backed up manually. This is not the most layout though. You will need to create and access your Samsung account if you have not already done yes. Badge everything you want to back up and touch the backup at the bottom. Samsung also offers also Switch, an app that allows you to back up your smartphone on a Windows or Mac computer. By default, they will only load Wi-Fi, but you can change it if you want for some reason. One thing to keep in mind when you enable this on Android, your Google+ apps and photos might automatically perform automatic photo backup to Google Drive too. By default, load only photos and videos when connecting to Wi-Fi. It is probably the best to leave it that way, so don't take the stravage expenses on your data plan. Note: The IOS OneDrive app also allows a further 3 GB of storage space. If you are trying to send files from your Android phone to a PC, try using Microsoft for free your phone app. Backing up to your backup files from your Android phone on a Mac is also quite simple. You can get 100 GB for \$ 2 per month or \$ 20th annually, 200 GB for \$ 3 per month or \$ 30 annual and 2 TB for \$ 10 per month or \$ 100 per year. The list of commalterments that appeared here differs based on the apps and services you use. Production earnings and extra photographic storage: Simon Hillyou can find your backups in the Google Drive app by tapping the menu at the top left and choosing Backup. It can be a challenge to stay under Google Drive for free 15 GB of storage space, so you may consider recording for a plan with Google One. For example, your photos will be in a DCIM labeled folder, camera. There are some premium apps for MacOS that offer more an experience of iTunes, but nothing you don't guarantee you for your Chromebook is how to back up files from your Android phone to a ChromeBook: Connect the phone into a USB port On your chromebook. drag down the shadow of notifications and seeks a notification from the Android system that says How to upload this device via USB, tap for more options and tap. Search for an option that says file transfer and select it. The file app will open on your chromebook and you can drag any file file To copy back-back to another Cloud Servicemaybe you have run out of Google Storage or prefer another cloud service. However, it seems that this trick worked only after adding it to Android. If you have installed the OneDrive app and want to save your photos on OneDrive, throw it and touch me> Settings> Options> Charge the camera and turn it on. The camera loading function on iPhone and iPad has different features, including: Do you use the mobile network? Include videos? Loading in the background picture and video are not small these days, so I highly recommend allowing only such photos if you have an unlimited data plan. It has that video of your child's first words, the heart beating message from your significant other that never fails to pull you up, and the last except from your favorite mobile game. You can share this storage with a maximum of six familiar ones. The Google One app offers more intuition and control for backups, found on the Storage tab listed based on the device backup. You may not want to pay for extra space, so let go look how to back up files directly to your computer before we immerse in alternative backup services. Backing up to your Windows PCPhotograph: Simon Hillet is easy to back up files from your Android phone to a Windows PC. It is advisable to stick with Google, since Samsung backups can only be restored to Samsung phones, but if you want a second backup or you are going to stick with Samsung, here's how to use the Samsung Cloud service: Go to Settings, Accounts and Backup , then backup and restore. Samsung Account, tap the data (the option to back up your Google account is listed here). This includes unlimited access to Wired.com and our print magazine (if you wish). Go ahead and turn it on. Subscriptions help to finance the work we do every day. Settings, Google and Choose Backup. You can see the quantity of storage available for the Google account you registered in the top.BELOW List that, you will probably see an option that says backup to Google Drive with a needle. Examine the simple steps. Car upload photos and videos on Android to OneDriverFirst, we'll start with Android. However, as simple and convenient like this, the backup of photos and making them easy to share is a completely different matter. Examine how it works and how to set it. For example, your photos will probably be in a DCIM labeled folder, camera. If you want something like iTunes to manage this process or an app to manage a wireless backup from your PC, you can find various premium online options, even if we not recommended anyone. It's rare these days to take pictures and videos with something different from a phone or tablet. Here's how: install the official Android file transfer app to your Mac. Plug the phone in a USB port on the Mac. an Android file transfer window should open up to your Mac and you will see a list of folders and files your phone call. Together and copy and paste any file you want to back up. It is better to leave the phone connected to a charger and connected to Wi-Fi during the night. The bottom section shows the backup details. Spend a couple of minutes the à €
